

EZPASS Parking System

Site security isn't just about people—it's about vehicles too. SafeSite USA's EZPASS-integrated parking system ensures only authorized vehicles enter, eliminating delays and enhancing security at access points.

- **Automatic Gate Entry** - EZPASS-enabled vehicles gain instant access without manual scanning or delays.
- **No Bottlenecks, No Tailgating** - Restricts unauthorized vehicle access, reducing theft and congestion.
- **Seamless Integration** - Works with existing site security systems and access control logs.

🔗 Discover EZPASS Access Control

Site security encompasses both people and vehicles. SafeSite USA's EZPASS-integrated parking system guarantees that only authorized vehicles gain access to the site

WORKER Authorized workers can use their existing credentials to access the EZPASS parking system, which blocks unauthorized users and provides detailed logging and reporting.

DELIVERIES: perfect for deliveries, granting access and tracking who is on site, for how long, and when. It can utilize MANY CREDENTIAL VERIFICATIONS INCLUDING QR codes or license plate recognition for seamless operation

EVENTS: The ideal solution for events, effectively managing and controlling existing parking situations by allowing only permitted persons to park.
